On this page we will make sure that the lights are programmed the way you want them to be.

Make sure that an "Animation/Effect" has been selected.

If in the "Animation/Effect" section it says "none", your lights will still turn on but not as the "Colour Palette" you selected.

Once you have the "Colour Palette, Animation/Effect, Speed and Intensity" all correct, click "ADD" or "Update" at the bottom of the screen.

Now Click: "SAVE" and then when asked, "I understand".

Once your controller reboots, your timer should work with your desired light settings.

## Thank you!

We hope you Love Coming Home to your GlowStone Lighting.
