

How To Use the Live Page

On the Glowstone Lighting Plus App

IMPORTANT

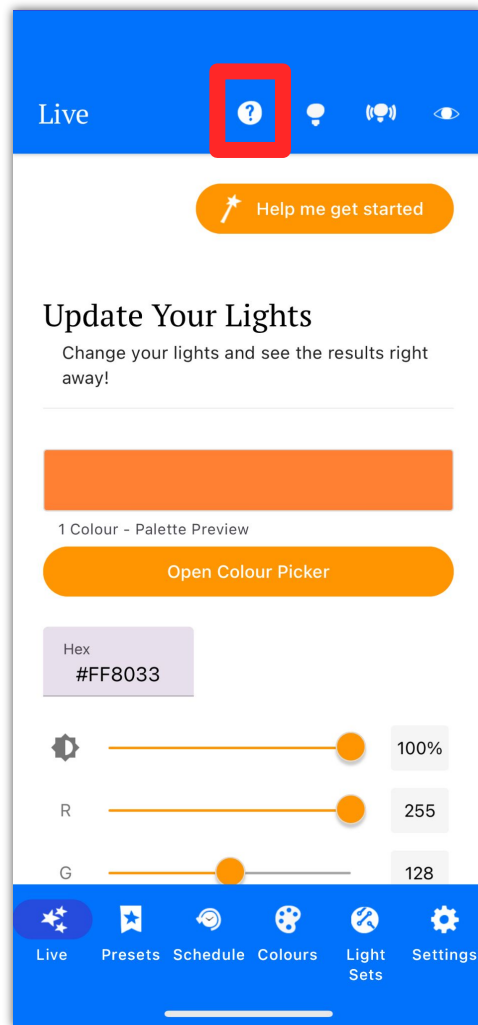

You will not be able to use the new “Glowstone Lighting Plus” app unless you have had a compatible **new controller** installed.

If you are unsure if you have the new controller or want to have one installed you can contact us by phone at 403-453-2224, or email at info@glowstonelighting.com.

#1

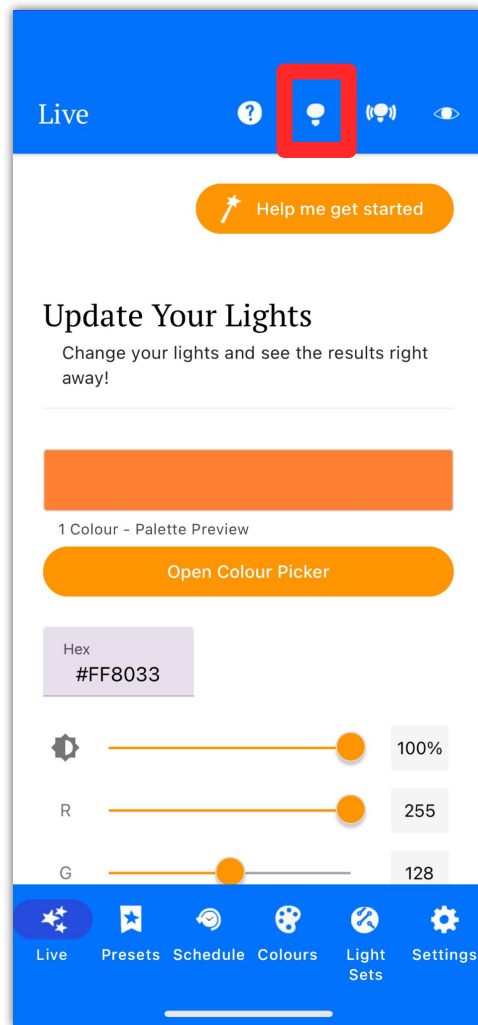

The first page on the Glowstone Lighting Plus is the live page.

Click here to access tutorials on how to use the app.

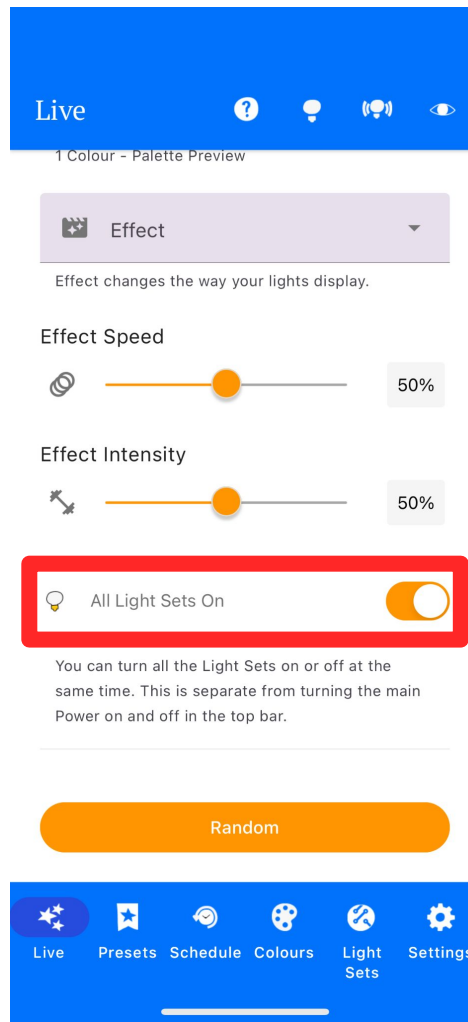

#2

This button allows you to turn the lights on and off.

#3

You can also turn the lights off at the bottom of the page by clicking here.

#4

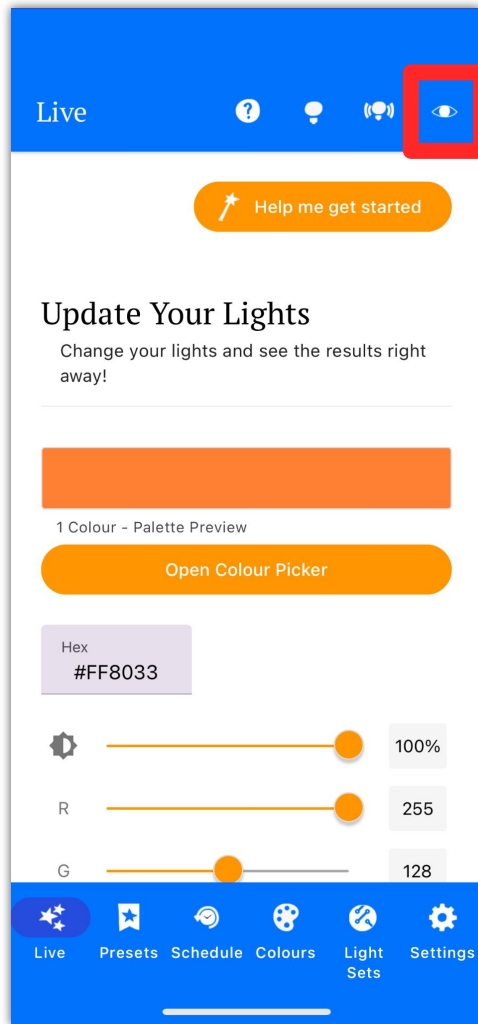

This icon indicates if you are connected to your lights. If it is white you are good to go.

If this icon is red you can find help [here](#).

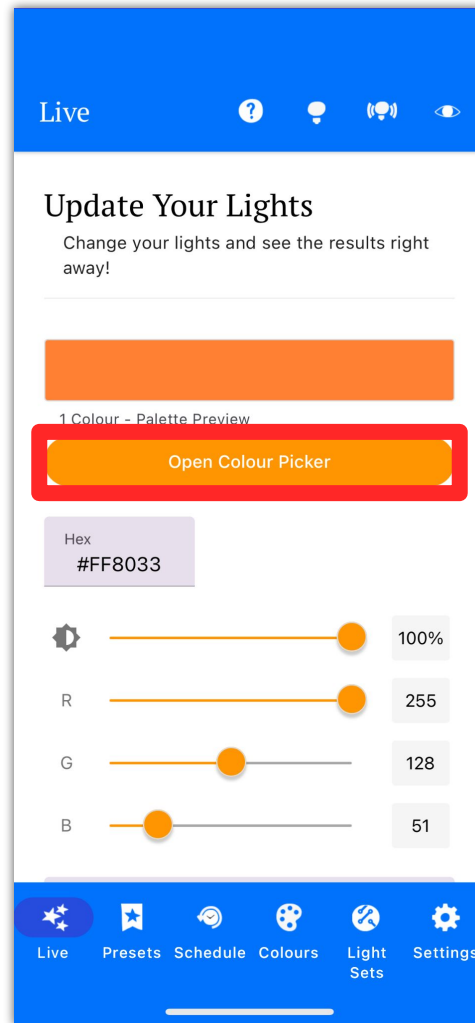

#5

This button allows you to see a preview of what your lights are doing.

#6

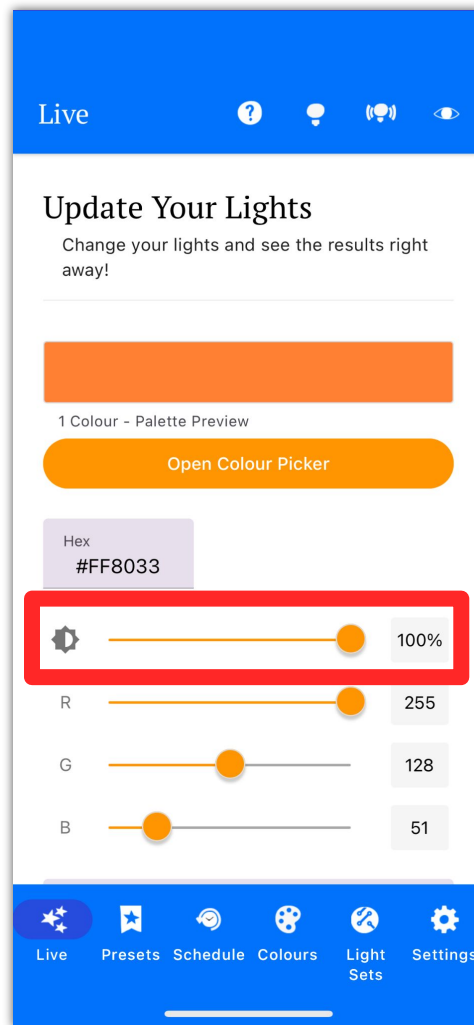

Clicking “Open Colour Picker” opens a colour wheel. Use this if you want a solid colour to be displayed on your home.

#7

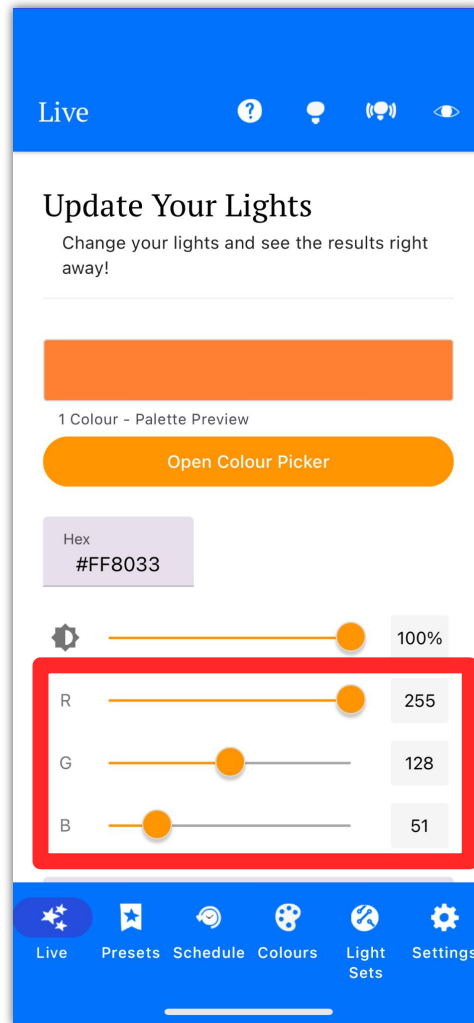

You can dim your lights by using this slider bar.

NOTE- You may not notice any difference until below 50%.

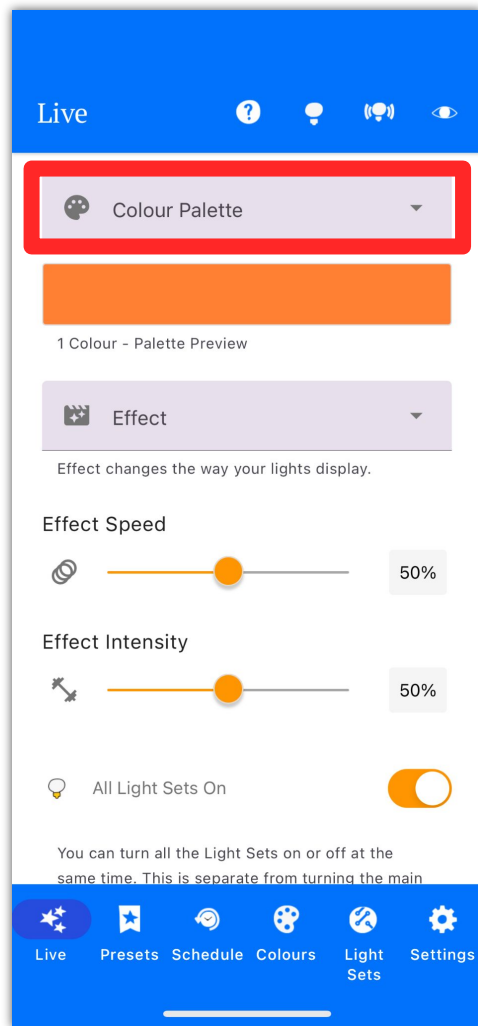

#8

You can also use these RGB sliders to adjust the colour of your lights.

#9

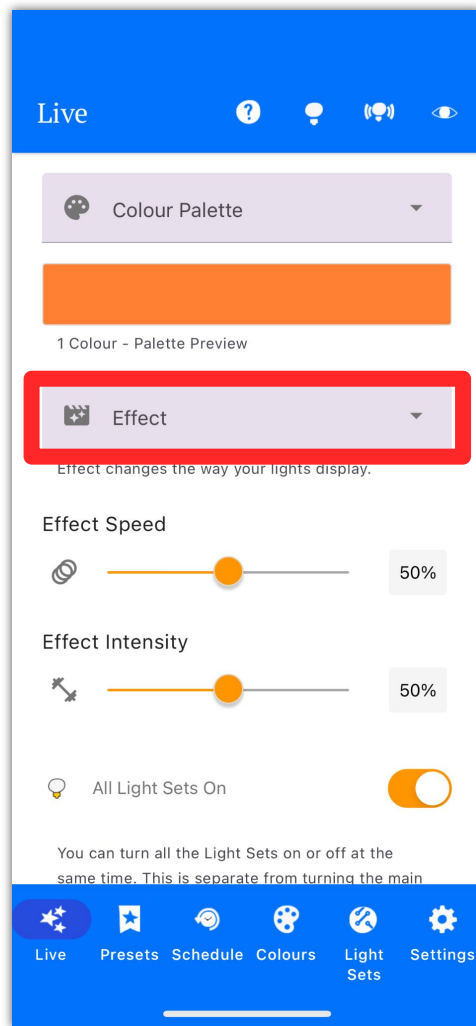

To make your lights do multiple colours you will have to select a colour palette here.

#10

You can change the effect that your lights are displaying by changing it here.

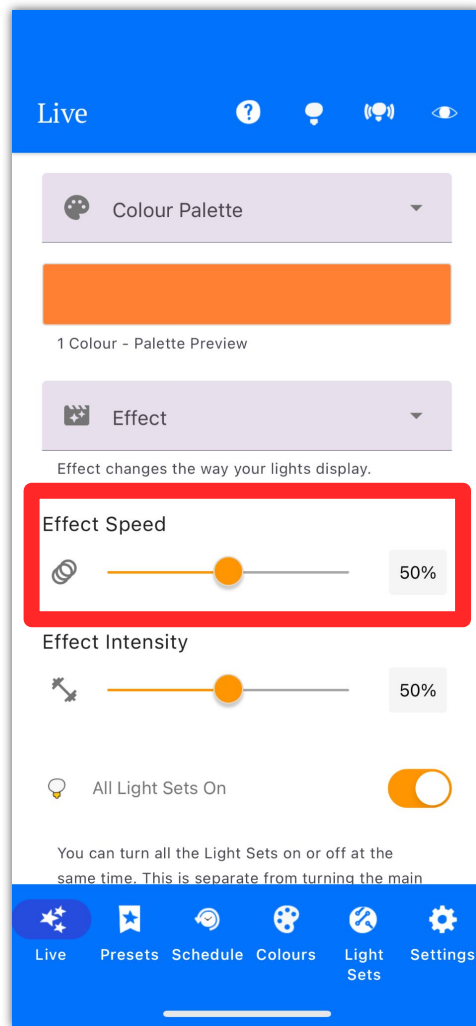

Some current favourites are Flow, Twinklefox and Solid Pattern Tri.

#11

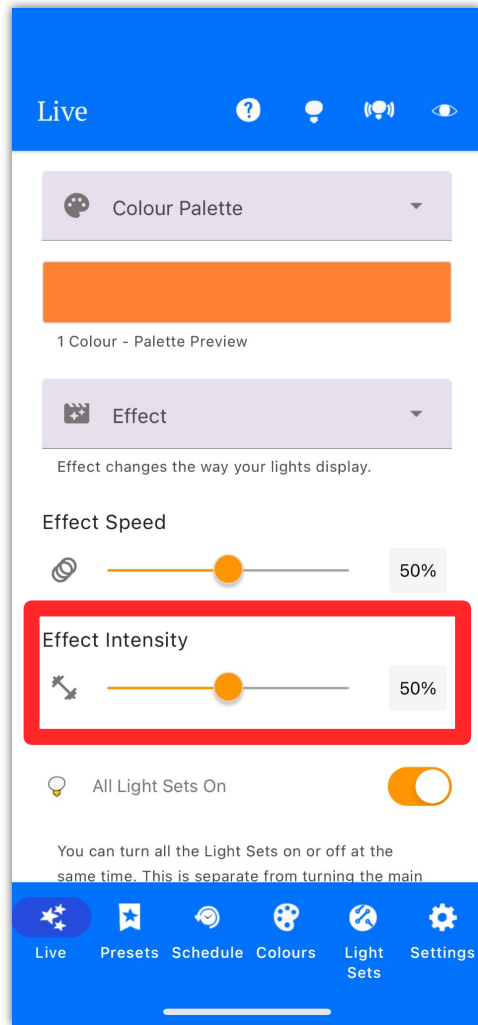

Effects can be altered by
“Speed” and “Intensity”

Speed changes how fast the
effect moves. (If the effect does
not move this will not change
anything)

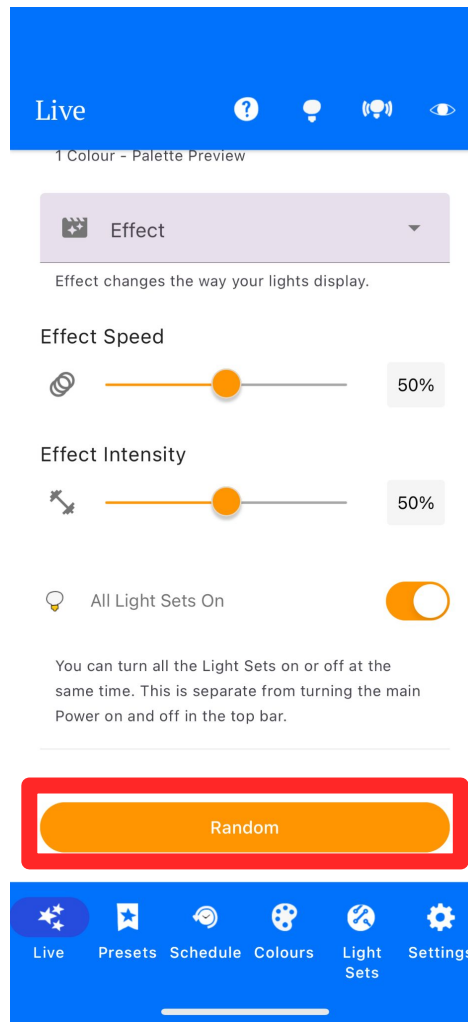

#12

Effect intensity alters the way effects display on your house.

#13

The “Random” button at the bottom of the page will display a random colour and effect on your home.

Thank you!
